

Fiddle

Low-friction Fiddle blocks build three- and four-part purchases. They come in a variety of configurations, including Fiddles with Cam-Matic cleats on adjustable arms and Fiddles with on/off Hexaratchet® switches that toggle the ratchet mechanism. Fast trim and release under high or low loads.

Ratchets grip loaded sheets, yet allow line to be eased with complete control. They feature Hardkote-anodized, Teflon®-impregnated eight-sided sheaves machined from solid aluminum for strength and corrosion resistance. Delrin® ball bearings, sheave, and sideplates are UV stabilized with carbon black for maximum protection. High-strength stainless steel straps reinforce blocks.

For easy removal, add a 111 snap shackle to the Little Fiddle and a 112 to the Fiddle.

Use for:
Mainsheets
Vangs

Removable becket allows insertion of spliced eye

Offset sheaves prevent lines from chafing each other inside block

Cam arms adjust to change angle of line into cam

Ratchet on/off switch works even when loaded

Cam reverses for up or down engagement/disengagement
