Strictly follow all instructions to avoid an accident, damage to your vessel, personal injury or death. See www.harken.com for additional safety information.

IMPORTANT: See Inspection and Maintenance at end of manual.

Features

One piece car body: machined from 6061-T6 aluminum for strength and durability.

Hardkote anodized: Teflon impregnated for durability

Captive ball bearings: make cars easy to load and maintain.

Free running ball bearings in car and in control blocks: make it easy to adjust car under load.

Terms

Track Compatibility CB CARS ONLY ROLL ON CB TRACK

32mm cars listed above roll on the following tracks. **Note: 32mm cars are CB style and only roll on CB track listed below.** Older tracks do not have the grooves at the waist for the keeper wires. If cars do not fit you must replace track. Contact Harken.

Part No.	A in mm	B in mm	C in mm
Low-Profile Track			
3154, 3155, 3159, R32.1.5M, R32.2.1M, R32.3M, R32.3.6M, R32.6M, 3159.8, 3159.12	1 1/4 32	3/4 19	1 5/8 42

3156, R32HB.1.5M, R32HB.1.8M, R32HB.2.5M, R32HB.3.6M	1 1/4 32	2 1/4 57	1 1/16 30

Curved Track Limitations

Cars will not roll on curved track if the radius is under the minimum listed below. A shorter car can roll on a smaller radius. Refer to the chart below and make sure the radius is equal or greater than the radius listed for the car. To find the radius go to www.harken.com.

Car	Minimum radius	
	ft	m
3160/3163/3164/3176/3177 T3201B, T3202B, T3203B, T3205B, T3221B, T3222B, T3231B, T3232B, T3241B, T3242B	8	2.44

Track for Unsupported Spans

32 mm High-Beam Track Spanning Chart

Harken high beam track is designed for unsupported spans. The length of span depends on the load on the car. The higher the car load the less span the track can handle. If the car is sized correctly, car length determines the spanning capability. Longer, high-load (HL) cars require shorter spans because the loads are so much greater. See track spanning chart in track instructions. www.harken.com

Attaching Mainsheet and Control Blocks

Stand-Up Toggle

Stand-Up Toggles – Harken standup toggles fit specific Harken blocks. To determine mainsheet block compatibility see instructions. (Add Link)

Soft Attachment (T3205B, T3205B.HL) – To attach loops or straps, remove stop screws and push attachment post out. Assemble post using blue Loctite on screws.

Soft Attachment Post

Attaching Splice to Deadend on Car or Controls

To attach premade splice, pass eye through bail and run tail through to make a hitch without undoing bail. If line is too large for this, remove one screw and rotate dead-end eyestay to load the splice. Reassemble screws using thread locking solution such as Loctite® blue.

Installing Traveler Car on Track

Position car at end of track and gently roll on. Car should roll on easily, if not check to make sure you are using CB track. **Do not remove ball retaining wires.** Cars will not roll unless they have retaining clips. If any balls are lost refer to following instructions for quantities and how to load.

Reeving Cars and End Control Blocks

2:1 Purchase

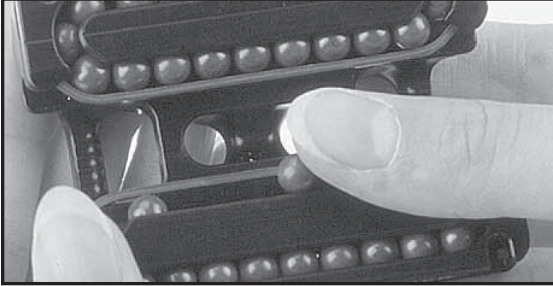

3:1 Purchase

4:1 Purchase

Loading Ball Bearings into CB Cars

Position car on edge with retaining clip in place. Gently push one ball at a time into car from center of clip. Allow balls to roll into return race and insert remaining balls. **Do not overfill car!**

Ball Replacement Chart

T3204B.HL, T3224Bj.HL, T3234B.HL, T3244B.HL	15" (381 mm)	144*	Torlon	547	25	3 ³ / ₈ "(10mm)

*Coupled car assembly—each car has 72 balls

Removing Ball Bearings from CB Cars

Position car on edge and gently push one ball at a time from center of retaining clip. **Do not remove retaining clip from car!**

Inspect

Frequently inspect shackles and control block fittings for signs of fatigue and replace as necessary. Make sure every installation includes Harken track end stops. Arrange control tackle so cars do not hit end stops under load.

Maintenance

Traveler Cars: Clean by frequently flushing with fresh water. Periodically clean car by squirting a detergent/water solution into center openings. Roll car back and forth to distribute evenly then flush bearings with fresh water.

Do not use spray lubricants because ball bearings may skid not roll. Apply one to two drops of McLube® OneDrop™ to ball contact surfaces of track. Roll car back and forth through OneDrop™ several times to distribute onto bearings. Wipe remaining OneDrop™ off track. OneDrop™ is preferred but you can also use one to two drops of a light machine oil, such as 3-in-1. Too much oil attracts dirt.

Track: Clean with detergent and water.

Important: Exposure to some teak cleaners and other caustic solutions can result in discoloration of part and is not covered under the Harken warranty.

Warranty

For additional safety, maintenance and warranty information see www.harken.com or the Harken® catalog.
