Installing Plastic Mast Guard

Use rubbing alcohol to remove residue from mast.

Remove blue backing from mast guard and place below mounting hole.

Maintenance

Harken equipment is designed for minimal maintenance, but some maintenance is required to give the best service and to comply with the Harken limited warranty.

In general, the most important aspect of maintenance is to keep your equipment clean by frequently flushing with fresh water.

In corrosive atmospheres, stainless parts may show discoloration around holes, rivets and screws. This is not serious and may be removed with a fine abrasive.

Warranty

See the Harken catalog for full maintenance and warranty information.
